## Skills

- **Languages/Libraries**
    - Java, Apache POI, C, R, R Shiny, SQL, JavaScript, Redux, React, PHP, UML, Python, pytest, MATLAB, TypeScript, COBOL
  - **Web Design**
    - HTML, CSS, Bootstrap, WordPress
  - **Programs/Tools**
    - Android Studio, Eclipse IDE, IntelliJ IDEA, VS Code, GitHub, GitLab, WooCommerce, Microsoft SSMS, Microsoft Office, Google Firebase, Cypress.io, Maven, Figma
- 

## Education

### **B. Comp. (Computer Science) – Year 4**

Present | University of Guelph, Guelph ON

Guelph, Ontario

- **GryphTravels** – Application developed in C for class project to calculate costs of hotels and flights. Application available [here](#).
  - **iWin** – Application developed in C for class project to allow users to play tic-tac-toe with the computer. Application available [here](#).
- 

## Work Experience

### **Mainframe Operations Analyst | May 2023 – Present**

**RBC | Toronto ON**

- Monitoring mainframe panels to ensure technical problems are dealt with efficiently
- Scheduling, running, and cancelling batch jobs
- Using the Python pytest library to write tests for back-end functionality
- Using TypeScript, Redux, and React to develop web pages and components

### **Data Scientist | May 2022 – December 2022**

**Roche Canada | Mississauga ON**

- Understanding clinical trial data and applying data manipulation techniques as required
- Creating R Shiny web apps to display tables, listings, and plots
- Using Java and Spring Boot to develop and test code to aid in parsing spreadsheet data
- Using JavaScript, React, and Cypress to develop tests for a full-stack web app in an agile environment

## Teaching Assistant | September 2021 – Present University of Guelph | Guelph ON

- Course:
  - CIS\*1910 – Discrete Structures I
  - CIS\*2910 – Discrete Structures II
  - CIS\*1300 – Programming
- Facilitating lab sessions and collaborating with students on practice questions
- Recording assignment solutions
- Holding office hours
- Answering questions in live lectures
- Developing auto-grader software

## Private Tutor | September 2019 – September 2021

- Tutored students in grades 9-12 Mathematics, Physics, and Computer Science courses

## STEM Tutor | June 2019 – September 2019 Math4Me | Brampton ON

- Tutored STEM subjects (e.g., Mathematics, Chemistry, Physics) for students in grades 9 to 12 (academic and applied stream)

---

## Projects

**CarDealership Project** – Java Swing application that simulates a Honda dealership employee/customer user interface. Developed for Grade 12 university level Computer Science final project. Application available [here](#).

**GTA Challengers Sports Club Website** – A website for a sports club designed and co-developed using PHP, Bootstrap, HTML, and CSS. Website available [here](#).

**RexallPrescriptionData** – Java program that uses the Java Apache library for Microsoft Excel to analyze data from Rexall Pharmacy customers. Application available [here](#).

**Elephant King Fitness Blog** - A WordPress blog that I created to showcase my fitness journey. Website available [here](#).

**Programming Assignment 1 Auto-grader** – A Java object-oriented program that allows teaching assistants to automatically compile student assignment files and displays a series of prompts based on a grading scheme. Code available [here](#).

---

## Extra-Curricular Activities

- Society of Computing & Information Science - **Vice-President Communication** | April 2021 – Present
  - Organizing meeting minutes, publishing electronic documents, coordinating with Year Reps, and managing marketing materials
- Computer Club - **President** | February 2018 – June 2019
  - Managed projects and taught students how to design websites with HTML and CSS
